

**Product name : Holding magnet for welder KMP-2 270x220x90 / F**

## PERFORMANCE PARAMETERS

Manufacturer	Enes Magnesy
Length	270 [mm]
Width	220 [mm]
Height	90 [mm]
Magnet type	Ferrite
Maximal hoisting capacity	370 [kg]
Fixing details angle	90
Maximum working temperature	$\leq 150$ °[C]
with easier detachment	yes
Handling mode	manual use
Number of axis to attach details	2
Weight	6.5 [kg]

Holding magnet for welder is used to hold steel elements during welding works, keeping at the same time the angle of 90°.

Highly regarded among welders, eliminate the need to hold a workpiece with hand, resulting in "two hands free". Additionally this holding magnet has a relatively high pull force is ideal for securely hold both small and large and heavy elements.

The eccentric eye makes a detachment easier.

In the holding magnet sintered ferrite magnets were used.

The maximum working temperature for this holding magnet is **~150°C**.

*We generally recommend individual checking of the holding magnet in any specific working conditions.*
