

**Product name : Permanent magnetic chuck (sine) 2-axis TSD-1710A**

## PERFORMANCE PARAMETERS

|                                           |                                              |
|-------------------------------------------|----------------------------------------------|
| Length                                    | 175 [mm]                                     |
| Width                                     | 100 [mm]                                     |
| Height                                    | 110 [mm]                                     |
| Magnet type                               | Neodymium                                    |
| Maximum working temperature               | ≤ 80 °[C]                                    |
| pole layout                               | poprzeczny do kierunku obróbki, 1,5 + 0,5 mm |
| with separable magnetic field             | yes                                          |
| Magnetic field switcher                   | yes, one for all planes                      |
| handling mode                             | ręczny                                       |
| for the small parts holding               | yes                                          |
| Number of axis to attach details          | 2                                            |
| force needed to mount ( to attract) items | 100                                          |
| Weight                                    | 13 [kg]                                      |
