

MAGNETIC FILTER BAR WITH WOODEN HANDLE 32 X 200 / N (NEODYMIUM)

PERFORMANCE PARAMETERS

Manufacturer	Enes Magnesy
External diameter	32 [mm]
Length	200 [mm]
overall length together with handle	340 [mm]
Magnet type	Neodymium
Maximum magnetic field over the middle poles	0,75 [T] (7500 [Gs]) +/- 5%
Magnetic induction is measured with a teslameter with a hall effect flat probe.	
polarity	circumferential poles
Maximum working temperature	≤ 80 °[C]
Housing	stainless steel, AISI 304 / EN 1.4301, approved for contact with food
water-resistant	yes
Waterproof	class IP67
With handle	yes
Weight	1.1 [kg]

25x7x2,4/N38 - Neodymium magnet

This is a block magnet. It is rectangular in shape.

It is a neodymium magnet, magnetised along the height. It has two poles, which means it is double-sided. It has been protected against corrosion by nickel plating. It has been manufactured according to excellent dimensional tolerances. The maximum operating temperature is no more than 80 degrees Celsius. Neodymium magnets stick to metal surface. You can attach magnet to surfaces made of ferromagnetic materials. This magnet is strong for its dimensions.
