

**Product name : Sheet metal magnets (kit) MCB-82**

## **PERFORMANCE PARAMETERS**

Hold sheet metal magnets with shaped straps find application in welding as well as in pattern-making and a body shop. The holding magnets have a rubberized surface so that they can be applied for fine, painted surfaces without fear that the paint is damaged. The pull force of 45 [kg] ensures a strong contact pressure on the glued or welded surfaces. The kit includes two magnetic handles Below are the examples:
