

Product name : TIG Feeder Stand - Magnetic Base MTH800
Stronghandtools

PERFORMANCE PARAMETERS

Manufacturer	Stronghandtools
Length	254 [mm]
Width	66 [mm]
Height	56 [mm]
Maximum working temperature	≤ 80 °[C]
Weight	0,5 [g]

Adjustable stand with magnetic base for TIG wire feeder. It increases the accuracy of welding and reduces fatigue to better adapt to the requirements of the production environment.

Stability and greater accuracy of wire feeding, which is not possible with the manual method.

Place the compact universal magnetic base anywhere on your steel work surface, even in tight spaces.

Place the base at the perfect height and angle for each job (max. Height 25 cm).

Install the TIG ATF100 [sold separately] on the swivel head, position the adjustable 2-piece arm as required, and lock into position by tightening the screws.
